## Prevent data loss, eliminate costs

Data Protection Solutions by Arco prevent data loss, by backing-up business critical data on desktops, workgroups or servers - without affecting system performance.

The most cost effective method of data recovery protection available, our innovative Disk Mirroring and Disk to Disk (D2D) products are based on four generations of patented technology - keeping pace with growing hard drive capacity and the demands of the "near-line market".

## About Data Protection Solutions by Arco

### Cutting edge product lines – patented DupliDisk (dd3) technology

Data Protection Solutions by Arco (DPS) is a leader in the development and manufacturing of disk-to-disk backup solutions. For 15 years system integrators and end users worldwide have used our products and relied on our patented DupliDisk technology.

### The emerging near-line data market

Desktop hard drive capacities have grown to hundreds of gigabytes and outpaced the tools and products available to protect this data.

Tapes, CDs and Zip drives fall short on capacity. More importantly, they are no longer as compelling for ease of use reasons. As a result, a new data protection market has emerged. The near line market protects desktops and workgroups. DPS is at the forefront of the technology and solutions being developed for this market.

### Innovative OEM solutions

Part of DPS' success comes from our ability to use mirroring technology to meet the needs of OEM customers. Using this core technology, we have easily created a variety of custom products for this clientele.

## Case Study: CTI, Telephony, CAD/CAM

### The Company – Nex Computing Solutions

Phoenix based NEX Computing Solutions, Inc. (NEX) offers computer systems for the CTI, telephony, process control, computer aided design/manufacturing and other industrial applications.

### DPS Solution: What the client says

"Peace of mind and quality of service go hand in hand. We therefore have selected a DupliDisk product from DPS to protect our customers' data. It's one of those products you install and forget about, and there is zero maintenance. It just quietly does its job in the background and only makes a noise if there is a problem." - James Domschke, VP Operations, NEX Computing Solutions Inc.

NEX integrates the DupliDisk into hardware platforms and ships turnkey products to Computer Telephony Integration, Point of Sale, Process Control, CAD/CAM and Interactive Voice Response customers.

"One of the reasons we chose DupliDisk from other similar products on the market was based on its price and reliability. NEX Computing Solutions Inc has an excellent reputation because of its focus on quality, service, and support. DupliDisk reinforces our mission", comments Domschke.

### Unique product features

DPS DupliDisk3 (dd3) Disk Technology provides real-time data mirroring. If your hard drive crashes, your computer continues to run smoothly with no data loss. The product operates by writing data both to your original drive and to a backup drive. With DupliDisk3:

- It uses virtually any operating system, uses no system resources and requires no device drivers.
- Each time you save a document or make a change, the same action occurs simultaneously on both the primary and the mirror drives.
- There is no delay time and writes are automatic.
- No need to copy the second drive from the first. Should your hard drive fail, the DupliDisk sounds an alarm and automatically switches all operations to backup. Your system continues to operate with no downtime or loss of data.

Ez BACKUP  
Ez RAID  
Ez COPY

EzRAID allows anyone to perform RAID1 data mirroring of a hard drive quickly and easily with the turn of a key. A true hardware solution, EzRAID requires no software to be installed on your machine. Just plug it in and it works.

All RAID functions can be performed from the unit's buttons and front panel LCD's. Optional software utility included for Linux or Windows OS.

EzRAID's advanced power and bus management allows you to hot-swap drives. If a drive fails, there is no need to shut down the computer. Simply slide out the failed drive, slide in replacement and EzRAID re-mirrors your data.

**MSRP: US \$599.00**

## Features & Benefits

- True OS independence
- Platform independent
- Patented technology
- Front panel LCD & status LEDs
- Requires no drivers, IRQs or TSRs
- Supports mixed (dissimilar) drive sizes and manufacturers.
- EzRAID mirrors your entire hard drive, including all data, boot record, partitions, programs, preferences, etc.
- Your computer remains fully functional during the RAID operation
- No tapes, CDs or cartridges to change
- Virtually unlimited capacity - Up to 144 petabytes.
- Lightning fast copies - less than one minute per gigabyte.
- Mirror drive is completely bootable.
- Easy and fast restoration of your hard drive
- "Lock" position prevents unauthorized computer use.
- User configurable.

## System Features

- SATA 1.5Gbps (150 MB/sec)
- Hardware independent
- 100% data redundancy
- Native utility for Windows XP, 2000 and 2003
- No bus slot required
- All other PC operating systems utilize EzMirror setup feature
- Protective insulating shell
- True OS independent operation
- Support for 2 drives LED drive operation indicators and audible alarm
- No demand for system resources
- True background rebuild
- No drivers, TSRs or IRQs required
- Remote administration / notification capable

## Specifications

## Monthly Promotional Special

### Can you restore critical data quickly? EzBACKUP can.

Combining the reliability and speed of D2D with it's patent pending Hidden Device Technology, EzBACKUP provides these features and benefits:

- a. No software drivers or IRQ's required
- b. Hot swappable backup capability
- c. Storage capacity expandability
- d. Speed of operation
- e. Patented Disk-to-Disk (D2D) technology
- f. Full bootable image backup
- g. Backup all, modified or selected files
- h. Flexible backup scheduling
- i. Patent pending HDT (Hidden Device Technology)
